

## **National Cancer Institute Offers Funding for Small Businesses**

Small businesses are encouraged to apply for funding from the National Cancer Institute SBIR and STTR programs.

These programs provide funding at different stages of development, helping small business develop and commercialize novel technologies and products to prevent, diagnose, and treat cancer.

### **NCI SBIR Grant Funding for Image Guided Cancer Interventions**

Grant funding is available to eligible small businesses for the development and commercialization of novel image-guided interventions to prevent, diagnose, and treat cancer. Applications are due on the following dates in 2010: April 5; August 5; December 5. To learn more, visit <<http://sbir.cancer.gov/funding/grants>>.

### **SBIR & STTR Omnibus Solicitation**

U.S. small businesses with the research capabilities and technological expertise established in the Omnibus solicitation are encouraged to submit investigator-initiated grant applications. High-priority research areas under the National Cancer Institute are listed below. Applications are due on the following dates in 2010: April 5; August 5; December 5. For more information, visit <<http://sbir.cancer.gov/funding/omnibus>>.
